

INSTANT OCEAN SEA SALT

by AQUARIUM SYSTEMS

\$18.99

Instant Ocean is the most carefully formulated and universally preferred sea salt in the world. The number 1 choice of hobbyists, public aquariums and scientific research facilities. IO sets the standard in the marine industry for quality consistency and value for over 40 years.

INSTANT OCEAN HYDROMETER

by MARINELAND

\$18.99

Accurate, reliable water test equipment is absolutely vital to creating and sustaining a healthy, successful marine environment. Easy to read and simple to use, the Instant Ocean Hydrometer delivers precise full-range salinity and specific gravity readings -- operate, the Instant

API® REEF MASTER TEST KIT

by Mars Fishcare

\$44.99

The API® Reef Master Test Kit test 4 key parameters – calcium, carbonate hardness, phosphate, and nitrate – to keep reef inhabitants healthy. Testing is fast, easy, and accurate, yielding precise results, and comes with 4 glass test tubes with snap-tight caps and a convenient holding tub for easy, reusable storage. This kit also includes a complete, step-by-step instructional booklet with a color chart that provides information on how to correct unsafe water conditions. We recommend that you take a few minutes each week to monitor your aquarium conditions and create a better underwater world for your fish. Testing your aquarium water has never been so easy or accurate! Includes 7 test solutions, easy-to-ready instructions, glass test tubes and color chart.

SEACHEM® REEF BUFFER™ RAISES PH TO 8.3 250 GM

by Seachem

\$6.59

When used as directed Reef Buffer™ will raise the pH of your reef system to 8.3 without fear of accidentally overshooting the pH to a dangerous level. Whereas competing products simply use sodium bicarbonate, Reef Buffer™ is made with a blend of carbonate and bicarbonate salts. This blend of salts results in Reef Buffer™ yielding a pK of roughly 8.6 in saltwater. The pK of a buffering agent is equivalent to the pH around which that buffer most strongly buffers. One would presume, then, that the pK of a saltwater buffer should be 8.3; however, the multitude of organic acids produced by the inhabitants of a reef system forces pH downward to a much greater degree than in a non-reef, marine system. A buffer with a pK of 8.3 would end up yielding a pH more in the range of 8.0-8.2. Reef Buffer's™ higher pK (8.6) allows for greater pH stability in a reef system where the bioload is significantly more than in a fish only system. Competing products are not designed specifically for the reef environment, so their pK is too low (in most cases, pK 8.3). At

SEACHEM® DE:NITRATE™ FILTER MEDIA 1 L

by Seachem

\$17.99

de:nitrate™ is an economical, natural, porous material with a pore distribution and geometry that promotes both aerobic nitrification within the first few millimeters of depth and anaerobic denitrification at the core. The material has a high surface area and supports a high density of bacteria. Although de:nitrate™ has capacity to trap nitrate, this, as with other nitrate retaining materials, such as certain zeolites and synthetic resins, is quite limited and the primary mechanism of nitrate removal is anaerobic. "Live" rocks or reef rocks remove nitrate by anaerobic denitrification. de:nitrate™ removes nitrate by the same process. Efficiency is magnified several folds by forcing the water to filter through the porous de:nitrate™. As with reef rock, anaerobic conditions are achieved by the porosity and the depletion of oxygen by the aerobic process at the surface. Excessive flow rates should, therefore, be avoided, as they may impede development of an adequate anaerobic environment to

AroPaw Aquarium Cleaning Tools Set Includes Waterproof BPA Free Gloves, 2 Pack Algae Scraper Sponge Scrubber Pad, Aquarium Cleaner Fish Tank Cleaner

by AroPaw

★★★★☆ 43 ratings | 8 answered questions

Amazon's Choice for "fish tank cleaning gloves"

Price: \$15.99 ✓prime & FREE Returns

Get \$125 off: Pay \$0.00 upon approval for the Amazon Business Prime Card. Terms apply.

- **VALUE SET-** Includes extra long 100% Waterproof gloves and 2 XL algae glass cleaner scrubber to clean and protect from aquarium bacteria. Durable and long lasting, just rinse off when done. Can be used for all HOUSEHOLD needs.
- **TOP QUALITY-** Gloves are made from the best materials to ensure the safety of the fish. The scrub cleaner measure at 6.5 by 4.7 inch, and are designed to combat and remove all forms of growing bacteria.
- **BETTER THEN A TYPICAL SCRAPER BRUSH-** With our glove/sponge you can scrub all nooks and crannies not accessible via a traditional scraper with handle or magnet cleaner. No chemicals needed.
- **STRESS FREE MAINTENANCE-** Using our cleaning tool kit will enable a quick and efficient maintenance system for all size aquariums.
- **SATISFACTION GUARANTEED-** Reach out to us with any questions.
