Size: **Laptop**

- Laptop
- Laptop + Monitor
 - Universal office PC riser with a large vented tray works with Sony, HP, Asus, Apple MacBook, Acer, Toshiba, Chromebook, Netbook and gaming notebooks. Supports up to one 17 inch portable computer with its platform size of 14 inch wide by 11.8 inch deep. The bottom portion of the platform has a lip to securely hold the laptop in place.
 - The mount assembly is full-motion. The arm holding the laptop tray can be moved up and down on the vertical pole. The pole measures 17.7 inches from the desk surface. Dual folding arms have three joints that allows the tray to swivel/articulate left to right and towards or away from the user. The tilt angle of the tray can also be adjusted.
 - MI-3352LT notebook stand allows you to lift the laptop up from your desk surface for a sit-stand and standing workstation set up or to raise the laptop screen to an ergonomic height. Optimal

placement of the screen may help reduce eye, neck and back pain. Use it with a separate monitor desk stand or wall mount, or with our dual laptop/monitor stand (MI-3352LTMN) to increase display size and quantity.

- Made from heavy-duty steel (arms and pole) and Aluminum (tray) materials. It can carry up to 22 lbs of load. The laptop tray has venting holes to help with cooling by allowing the computer fan to discharge warm air from the laptop.
- Heavy duty "C" clamp integrated double lock ensures stable mounting onto the desk. The clamp mounts on desks or table with a thickness of maximum 4 inches. The pole and extension arms have cable management feature to organize wires and cables. Easy to install, you will be up and running in minutes.
